

**Catowhite AS LIQ.**

Technical Specification

C.I. No.	: 264
Chemical composition	: Derivative of 4, 4' – diaminostibene 2, 2' – disulphonic acid
Appearance	: Pale Yellow Liquid.
pH	: 10 + 0.5
Ionic Character	: Anionic
Solubility	: Freely miscible
Stability	: <b>CATOWHITE AS LIQ.</b> Is stable upto 12 Months at all ambient temperatures

**CATOWHITE AS LIQ** Is an exclusive optical whitening agent for paper surface coating application for to neutral sized paper

**APPLICATION:**

**CATOWHITE AS LIQ.** is recommended to add either after the complete preparation of coating mixture. It is suitable for co application bleaching in cotton. It is bluish violet to neutral paper & pulp. Good for addition in polyamides in 6 & 66, wool.

It gives excellent results in padding/ resin finish, process or pad, thermosol process.

**CATOWHITE AS LIQ.** is very much useful in developing the high brightness in paper/ textiles containing very high level of fluorescence of International shades where higher dosage of OWA is required in surface coating application.

**All Stock solutions of OWA are very sensitive to light.**
